Abdominal Aorta Duplex Exam					
Name:		Patient ID:			
Exam Date:	Exam Number:	Ht: in	Wt: lb	BSA: m ²	
Sonographer:		DOB:	Age: Yrs	Gender:	
Previous Study:		Study Location:			
Reading Physician:		Ordering Physician:			
Primary Care Physician:		Copy To:			
Medications:					
Indications:					
Risk Factors and Assessment:					
Procedure: Duplex and Color Doppler examination of the abdominal aorta was performed. Study quality was good.					

Artery	PSV	Diameter
Celiac	cm/sec	
SMA – Proximal	cm/sec	
SMA – Distal	cm/sec	
Right Renal	cm/sec	
Left Renal	cm/sec	
Aorta – Proximal	cm/sec	cm
Aorta – Mid	cm/sec	cm
Aorta – Distal	cm/sec	cm

Renal artery to proximal end of aneurysm is cm.
 Overall length of aneurysm is cm.

CONCLUSIONS
No Plaque was visualized. Doppler waveforms were laminar and velocities were within normal limits at sampled sites.

Electronically Signed
