Tips & Best Practices

- Use **Google Chrome** for best performance.
- Always confirm that the correct patient name and patient ID are displayed.
- Regularly clear browser cache if images or reports load slowly.
- Be sure your ethernet cord is functioning properly.

Troubleshooting Common Issues

- **1. Viewer won't open** – Use Chrome, allow pop-ups, clear cache, log out/in.
- **2. Study missing** – Refresh worklist, check network, clear cache, confirm routing with IT
- **3. Report won't finalize** – Click Review & Finalize (not Save), fill all fields, restart browser.
- **4. Login issues** – Reset password/username, verify site (<https://apc.freelandsystems.net>), call Freeland Support 1-888-615-1888 opt 2.
- **5. Blank Patient List** – Press the Clear button and hit Search to clear all fields. Use either a partial patient name or the patient ID—do not enter both.
- **6. Tools not working** – Reopen study, clear cache, restart Chrome.
- **7. Can't edit report** – If finalized or locked, contact us (see user guide for more information).
- **8. System slow** – Close extra tabs, clear cache, restart computer.
- **9. Studies not sending** - Check ethernet connection, check the spooler on the machine for error messages/codes, make sure the facility internet is working.
